 Taxes are imposed by a government and collected at regular intervals. Taxes include income tax, excise tax and tariffs. Although taxes are commonly thought of only a means of raising revenue for a government, it is important to recognize that taxes play a major role in country's economic policy.

It was quite late in human history that governments came to rely on taxes for the buck of their revenue, and these taxes were levied with the consent of the people governed.

In ancient Greece and Rome most of the state revenue came from income from mines, tribules from countries defeated in war, gifts from wealthy citizens and taxes on trade and consumption of goods. Generally there was no tax on income or wealth. Infact the burden of taxes was borne by poor people, slaves and conquered people. Tax was associated with bondage and slavery; only in modern times has tax becomes the sign of freedom. It was only after a long struggle during the middle ages that taxes become less arbitrary and oppressive. In modern societies taxes paid by citizens are indirect proportions in their income.

Questions:

- (i) What purpose taxes supposed to serve?
