Time—2 Hours

Maximum Marks—50

N.B. :— (1) Attempt any *five* questions.

(2) *All* questions carry equal marks.

1. Read the following passage and answer the questions given below : 10

There is a new factor operating in the world of knowledge today. Knowledge is changing much faster today than ever before. We all know this. But we have not begun to appreciate its implications in terms of the practical job of a teacher. Till recently most teachers taught more or less the same things as they had learnt as students and nobody minded. This cannot be allowed

P.T.O.

now. By the time a teacher has taught for ten years much of what he learnt a student, becomes outdated. A teacher is, therefore, unfit to teach unless he has the capacity and the habit of acquiring new knowledge all the time. This also means that it is not enough how to make students memories a certain amount of information. A good part of such information becomes outdated in no time. What students should be taught, in addition to a basic stock of information, is a habit of applying an active intelligence to new and emergent problems. If university education cannot do this it is not worth its name. We have only to look at questions set for the major examinations to be quite convinced that our universities do not even aim at doing it. The questions set do not attempt to test the capacity of students to think on their own to react to new problems.

Questions :

- (i) What is the new factor in the world of knowledge ?
- (ii) What is the importance of a teacher ?
- (iii) What does a teacher become unfit to teach ?
- (iv) What is the most important thing that a student should be taught ?
- (v) Comment your views on present education system.

8. Read the following passage and make notes from it : 10

The word 'Literature' is really hard to define. Many interpretations are made about the word, but all are incomplete. Some opine that Literature is the mirror of life, some others say that it is the criticism of life. Whatever may be the controversy about the word, we may say that literature is that which reflects life. The branches of literature are poetry, drama, novel and short stories. Poetry is of two kinds — imaginative and realistic. Drama is either a comedy or a tragedy. Novel is also of many kinds — historicals, psychologicals, realistics, scientific and regional. Short story is that one which stands very close to life in spite of little scope.
